This extremely rare example was assembled at Brighton. It's rarity is enhanced by being the 'bubble window' model, almost all of the 3-wheel Isettas had sliding windows. This little vehicle registers just two owners from new, the last recorded since 1990. It has been subject to much work during the last two to three years costing in excess of £14,000. This included the chassis, engine and gearbox being reconditioned and fitted by the UK's top Isetta specialist, The Bromley Bubble Company. Described as a lovely car that drives well. The history file contains a copy black and white photo reputedly taken inside BMW Brighton in the early 1960's. It also comes with email from the Homologation department at BMW, older style V5, receipts dating from 2018 to 2020, 1962 tax disc, club letters, magazines and workshop manuals. The mileage is recorded at 34,086.
